

GRANT GUIDELINES Full Grant

Our Company:

Energy Environmental is a Denver based company specializing in the design and installation of residential integrated renewable energy systems. Our mission is to educate and provide energy efficiency and comfort solutions to homeowners with an overall focus of reducing the impact of residential buildings on our community and environment.

Our Full Grant:

Our corporate responsibility involves aiding in the widespread implementation of renewable energy technologies and energy efficient practices for the benefit of our community and planet. We offer a full grant to qualified low income homeowners to help improve energy efficiency, indoor air quality and comfort, and reduce the carbon footprint of their home. This can be achieved through improvements to the building envelope, heating, cooling, and hot water systems. Systems and services may include one or a combination of the following: Insulation and air sealing, solar hot water system, geothermal heat pump system, residential wind system. Qualification criteria for our full grant program include:

- Homeowners that qualify for the Energy Outreach of Colorado LEAP program www.energyoutreach.org/help-leap.asp

Application Process

- In order to save on paper resources, **only email** copies of grant applications will be accepted.
- Homeowners may submit only one proposal in a calendar year.
- Decisions will be made within 4-6 weeks following the grant submission deadline.
- Depending on quality of applicants, the field will be narrowed down to several finalists who will be contacted by phone or email regarding a property evaluation. After an evaluation, EEC will then notify the final recipient of the grant and determine the next steps. Note: Being notified as a finalist does not guarantee awarding of grant.

Please direct questions and submit all grant application materials to: sue@energyhomes.org.

Upcoming Application Deadline: July 30, 2009

GRANT GUIDELINES CONTINUED

Homeowner name : _____ Application Date: _____

Property Address: _____

City: _____ State: _____ Zip Code: _____

Telephone: _____

Email: _____

• **Summary:** Tell us a little bit about yourself, what energy efficiency improvements you would like for your home, and how these will benefit you. (a few paragraphs)
